Welcome to Werner Electric Supply!

At Werner, we have grown to serve the needs of our loyal customers and valued partners since our modest beginnings in 1948. We provide diverse, high quality products and services from our locations throughout Wisconsin, Michigan's Upper Peninsula, and North Dakota.

Today, we offer over $30-million in inventory made up of 24,000 SKUs in our state-of-the-art, 250,000-square-foot warehouse and offices. As a key partner to our customers and vendors in all areas of business, Werner Electric strives to provide service that goes above and beyond expectations. Our engineers and product specialists are able to provide services such as technical support, training, inventory management, engraving, custom assemblies, modified enclosures, lighting design, and much more!

As President of Werner Electric Supply, I want to thank you for allowing Werner Electric Supply to serve your needs. We look forward to a successful long-term, and mutually beneficial relationship with you, our customers, for years to come!

Scott Teerlinck
President

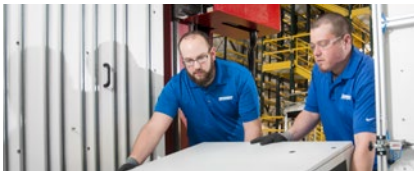
Werner Electric Supply: Our Values

Do you expect your suppliers to go above and beyond to benefit your business? Do you want to work with knowledgeable staff and have access to reliable technical support? Werner Electric Supply invests in its employees to ensure your business needs are met, whether you are calling to place an order with one of our dedicated customer service representatives or troubleshooting a controls issue with technical support. All of our customer service and sales support teams participate in up-to-date industry training to stay current on the latest products and technology. You can rest assured you are receiving unparalleled support from Werner Electric.

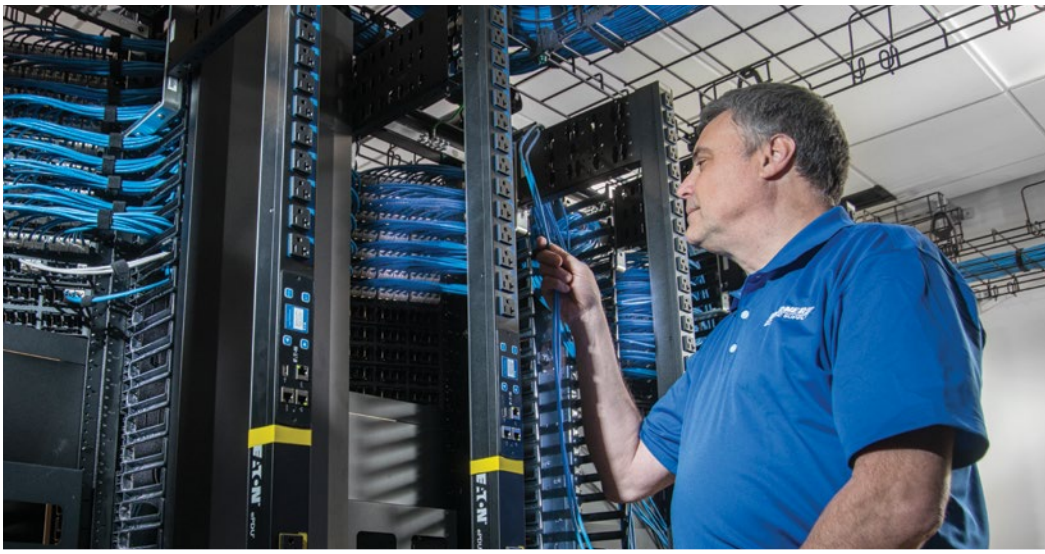
Werner Electric is also sensitive to the desires of customers like you who want honesty and integrity from your suppliers. That philosophy is instilled in our employees from the day they are hired. Employees are expected to proactively problem solve for our customers and provide the innovative solutions you need.

You deserve to work with a trusted partner and Werner Electric Supply continues to work hard to meet your expectations.

- **Customer Focus**
- **Accountability**
- **Honesty/Integrity**
- **Teamwork**
- **Communication**
- **Passion**
- **Flexibility/Managing Change**
- **Job Knowledge**



In Focus: Network Solutions



As data becomes exponentially more important in the decision-making process throughout the plant, reliability is the biggest key to the efficient collection of that data. Networks from the 80s and 90s won't cut it anymore. The days of maintaining separate enterprise and plant floor networks are over, too.

The convergence of networks can lead to optimum data collection. And the maintenance of a singular network offers several efficiencies. Werner Electric Supply has a dedicated team of product and application experts who can help customers navigate the troubleshooting aspect of their networks, as well as design new and improved networks. These individuals comprise our Network Solutions group.

Technical Services

One call to Werner Electric Technical Services puts you in touch with factory-trained technicians to give you application support, help with troubleshooting, and provide on-site assistance. We strive to be there for you every step of the way—before, during, and after your purchase. In addition to technical assistance, we offer a wide variety of training courses. We offer custom classes which can be designed specifically for your application.

Technical Training:

- High tech training (drives, programmable controllers, and software)
- Code updates
- Safety training (Arc Flash Hazards, Developing a Safety Program)
- Standards (OSHA, NFPA, NEMA)
- New product training
- Trends (energy efficiency practices)

Support:

- Systems design (lighting, control centers)
- Start-up assistance
- Specification assistance
- Troubleshooting (phone support, on-site visits)
- Hardware and software configuration
- Diagnostics
- Project management
- Energy audits

Pneumatics Services

Assembly of Pneumatic Components

Pneumatic components can be configured in an endless variety of ways. If you wish they were ready for installation right out of the box, now they can be. Werner Electric can handle all your custom SMC assemblies. Werner Electric is the only distributor in the region capable of testing these components before they leave the warehouse.

- Product Training
- Expert Consultation
- Engineering Assistance
- Customer Specific Inventory
- Authorized Assembly and Testing

SMC®

Werner Electric Supply has teamed with SMC USA to complete our automation product offering, and to supply you with the highest quality pneumatics products available.

Panelboard Building

Receive your panelboard in DAYS... not weeks!

We build panelboards for customers so that they can receive product in a couple of days vs. weeks from the factory.

Werner Electric Supply stocks panelboards in-house ready to pick up or ship out the same day. We stock 100, 200, and even up to 400 amp panelboards to satisfy your needs, as well as your customers!

Contact your Werner Electric switchgear quotations specialist or your local customer service representative.

Safety Services

Safety Training:

One of the most important components of any company's safety plan is training. Our courses cover vital topics such as arc flash safety and compliance. Plus, we regularly present seminars on a variety of topics throughout the year.

Courses Include:

- Arc-Flash Hazards NFPA-70E & OSHA 1910
- Grounding for Industrial Applications
- Industrial Control Panels: Designing for Compliance
- 2017 NEC – Industrial/Plant Electrical Maintenance

Rubber Goods Testing:

What's Included?

- Glove pick up
- Glove testing
- Certification date ink stamp
- Glove delivery after testing
- No freight charges (excluding hotsticks)

Additional Services

- Automatic Replacement
- Retest Notification
- Vendor Managed Inventory
- Fail Notification

Safety Audits:

Our team of Safety Experts can perform a safety audit at your facility to identify areas of concern. From safety gloves to overcurrent protection, our experts can supply you with all of the information and products you need to make your work environment safer.

- Hand Protection and Glove Analysis
- Fall Protection
- Lockout/Tagout
- Hearing Conservation Training
- Signs & Identification Systems
- Respiratory Protection
- Arc Flash Hazards
- Job Safety Analysis
- Technical Assistance for All PPE Products
- Hazardous/Flammable Liquid Handling and Storage

Custom Arc Flash Courses for Your Company

Potential Topics Include:

- What constitutes an electrical hazard?
- Proper lockout/tagout procedures
- Arc flash boundaries – the importance of securing your work area
- How - when - where to use personal protective equipment
- How to establish and maintain compliance
- Conducting electrical inspections
- Using the NFPA 70E task lists

2 or 4 CEUs

Learn how current OSHA standards apply to your facility, including NFPA 70E. Understand OSHA penalties for noncompliance. Learn about personal protective equipment and grouping.

LED Lighting: Smart Energy Solutions

LED Technology is rapidly expanding and improving. Werner Electric Supply is partnered with a variety of manufacturers, such as Philips Lighting, to provide customers with the best technology available.

- Interior/exterior floodlights
- Recessed cans
- Replacement lamps
- Control panel lights
- Outdoor area lighting
- Specialty lights

Werner Electric Supply is your committed Philips distributor.

PHILIPS

Lighting Services

Lighting Design

Werner Electric Supply offers design services for all of your commercial and industrial lighting projects. Our highly trained lighting staff can assist you every step of the way. Werner Electric's lighting department will develop a plan that implements cost-effective lighting techniques and energy efficient products.

- Specialists knowledgeable in the state lighting codes
- Expertise in the application of occupancy sensors
- Skilled in the application of exit and emergency fixtures
- Capable of performing complete energy audits
- Dedicated project coordination team
- Quotes on design/builds and public bid projects

Project Staging

Werner Electric is dedicated to making your lighting project easier to manage. We can store project materials in our warehouses for release to job sites on an as-needed basis. Our goal is to eliminate the headaches for you!

Werner Electric takes care of:

- Replacement of damaged fixtures before they are needed on the job site
- Freight claims on damaged product
- Expediting to ensure that the product is available when needed
- Packing and grouping to meet your needs as you release product
- Delivering to your job site when you actually need the product
- Professionally receiving materials so that your electricians don't need to become material handlers

AutoCAD Capabilities

Werner's Lighting Department can seamlessly and cost-effectively combine new lighting layouts with existing structural drawings using AutoCAD. We can import electronic files of your building's layout into AutoCAD and use these plans as the template to create your new lighting layout. As a result you don't have to keep track of several different sets of plans and you don't have to waste time and money making extra copies. Similarly, we can place your lighting layout over the top of your new construction drawings without extra effort or expense on your part.

Project Coordination

Werner Electric Supply offers complete coordination of your lighting projects. A coordinator is assigned to your lighting project to handle the details, including:

- Confirming P.O., bill of materials, and terms and conditions
- Entering orders with the manufacturers
- Tracking and expediting orders
- Sending weekly status/expedite reports of the products you have on order
- Preparing shop drawings and submittals
- Preparing O & M's if necessary
- Pricing and implementing all change orders and reconciling billings
- Coordinating replacements for damaged and defective fixtures and lamps

Pre-lamping

Werner Electric can pre-lamp your fixtures for you, making installation a snap and saving loads of time!

Lamp Recycling

Recycling intact lamps is the most cost-effective way to manage mercury-containing lamps as a hazardous waste. Werner Electric provides recycling services for hazardous materials such as lamps, batteries, and computer equipment.

Inventory Management

Werner Electric Supply has pioneered Vendor Managed Inventory (VMI) programs. Many customers like you have asked us to help them manage their spare parts inventory and they have seen the benefits firsthand.

VMI Assisted

You maintain control. We assist.

- You maintain control of which products are ordered and how often
- Werner Electric assists with organizing and labeling your products
- All orders are placed easily and electronically
- Reduce the amount of time your staff spends on the ordering process
- Place orders as often as you need
- Orders delivered next day in most cases
- Usage reports available at the touch of a button

VMI Pro

We take care of it all.

- We organize your inventory
- We order your inventory
- We deliver and put away your inventory
- We monitor your inventory
- We generate usage reports
- We make suggestions based on your usage history

Programs designed to help you manage your inventory in the most efficient and cost-saving ways since 1986.

Job Trailers & Job Boxes

Job Trailer

This safe and convenient storage method keeps your job materials under lock and key. You will always know where your products are, precisely when you need them. Your trailer will be delivered to your job site, complete with your initial order. A Werner Electric inventory specialist can also completely manage the inventory in the trailer. Once your inventory is checked in you will be given a key so you can access your product at any time.

- Secure, central storage of materials
- Protection from elements
- A Werner Electric inventory specialist can manage your inventory levels
- Electrical and communication hookups
- Planning table

Job Boxes

Moving materials from room to room has never been easier using a Werner Electric job box. Instead of keeping the materials in a central location you can take these rolling storage boxes with you. Our VMI team will make sure that you are fully stocked and ready to go!

Custom Assemblies

- Prefab of Construction Materials
- Prefab of OEM Electrical Components
- Assembly of Pneumatic Components
- Panelboard Building
- Panel Modification
- Panel Coordination
- Internal Staging of Lighting
- Pre-lamp Fixtures
- Kitting

We Get It Done!

In your business, timing is everything. You have limited time, and you don't want to waste it. Avoid the time-consuming but necessary assembly tasks that keep you from making money. Let us do it. Werner Electric can pre-fabricate, customize, kit, and stage the products you need for any project. Save yourself the hassle. No more long factory lead times. No more wasted time buying a laundry list of parts.

Engraving

- Thermal printing for long-lasting identification solutions (such as barcode labels)
- Quick turnaround
- Reverse engraving for easier cleaning and sanitary requirements
- Wide variety of colors and materials
- Logo/Artwork reproduction to match your corporate identity
- AutoCAD capabilities for seamless and accurate reproduction of machine diagrams
- Laser engraving
- Years of experience
- Mass production capabilities
- Identification labels on pneumatic & hydraulic cylinders

The engraved items you need... when you need them!

Werner Electric maintains a complete engraving workshop in-house and specialists to ensure you get the engraved products you need, when you need them. Our computerized engraving machines can engrave on very small items to very large items (up to 2' x 2'). We also have a thermal transfer printer that can print items, such as barcode labels, up to four inches wide.
