NATIONAL SAFETY COUNCIL CERTIFIED FIRST AID, CPR, AND AED SAFETY TRAINING

GO WITH THE EXPERT

Not all first aid and CPR courses are created equal. Many providers don't offer the comprehensive training needed to meet *OSHA First Aid Standard 29 CFR 1910.151*.

Don't put your employees' safety at risk, go with the expert in occupational first aid and CPR training!

CONSIDER THESE FACTS

- 25% of all emergency room visits can be avoided with basic first aid and CPR certification
- Sudden cardiac arrest represents 13% of all workplace deaths
- 75% of all out-of-hospital heart attacks happen at home

WHAT YOU WILL LEARN

- How to ensure victims get help quickly
- How to properly check a scene for safety
- Identify personal protective equipment (PPE)
- How to perform a physical examination
- Identify the signs and symptoms for shock
- Differentiate among first, second, and third-degree burns
- How to identify a concussion
- How to use an auto-injector to administer life-saving medication
- How to identify hypothermia and heat stroke

2 year
NSC
Certification
