reference guide

Trust Werner Electric Supply for all your Datacom needs.

Werner Electric Supply partners with industry leaders to provide you with a complete line of Datacom solutions and services. Our Datacom team of specialists can assist you with everything from camera surveillance and access control to structured cabling and wireless solutions. Our trained team can provide proof of concept and design creations, facilitate system startups, provide technical support and follow up with applicable training.

Look to our Datacom solution experts for the best answers for your applications. Reach out to the Werner Electric Datacom team so we can help you achieve success in selecting and configuring the right components for your Datacom needs.

INTERCOM & SOUND

Background music, pre-recorded announcements, zoned paging, and emergency evacuation broadcasts can all be done easily with the help of Werner Electric Supply. We'll help you broadcast quality audio through analog, digital, wireless, or IP-based systems from a single intercom system in one building, or across a network of intercoms in your building portfolio. We focus on the latest generation of audio technology, and can even integrate paging and voice evacuation systems onto one shared network.

PHYSICAL SECURITY ACCESS CONTROL

Werner Electric Supply provides cutting-edge, state-of-the-art access control hardware and software that delivers versatility, scalability, maximum protection, simple operation, and cost efficiency. We can determine whether traditional, IP based, wireless, or managed access control is best for your application. The systems we offer provide distributed network architecture, so they can be connected to any networked workstation or directly onto the network, saving you money on wiring and installation. To reap the most benefit, Werner Electric Supply can integrate your access control with other security components. In a holistic security environment, for example, if the access control system identifies unauthorized access, that can trigger your security cameras to zoom in, store the video on a digital recorder, and tag that segment for retrieval later. It may also activate an alarm at a security console and send an alert to necessary parties. From electric locks and door monitors to advanced biometrics, Werner Electric Supply can do it all when it comes to access control. You'll find relief in knowing your occupants are protected, and they'll feel safe knowing they're shielded from uninvited guests.

VIDEO SURVEILLANCE

Werner Electric Supply is dedicated to supporting your business in IP and other growth areas of physical security. Werner Electric Supply offers several options. Our video and security partners are ready to provide knowledge and expertise to align you with further business opportunities involving analog, hybrid and IP security. Protect through city-wide surveillance, education, transportation, retail and gaming operations. We also offer unique security training and learning opportunities for security integrators through our extensive education programs, seminars, and demonstrations. Contact Werner Electric Supply for a complete solution from power supplies to cameras to DVR's and NVR's.

COMMERCIAL & INDUSTRIAL INFRASTRUCTURE CABLING SOLUTIONS

Werner Electric Supply is a leading supplier of high-quality, cost effective copper and optical fiber cabling and component support systems. We partner with industry leaders to provide you with the products you need, when you need them. Our Project Management team and internal staging services set us apart from our competition and will save you valuable time, money and unwanted surprises. Werner is aligned with key manufacturers to supply you with products that meet or exceed applicable industry standards and ensure quality installations.

EQUIPMENT PROTECTION SOLUTIONS

Werner Electric Supply is a leading supplier of equipment designed to protect sensitive electronic components and cabling. We offer a complete line of UPS's, enclosures, racks, cabinets, cable & wire management, and power distribution and cooling solutions for Industrial and Commercial Communications, along with Data and Security applications.

Access Control

HES ELECTRIC DOOR STRIKES

1006 Series

The 1006 series is the strongest and most versatile electric strike available. The dual interlocking plunger design and heavy duty stainless steel construction, enables it to exceed every standard developed for electric strikes. With multiple faceplate options, the 1006 will fully accommodate every lock designed to work within an ANSI 4-7/8" strike plate. Tested to exceed 3,000 lbs. of static strength, 350 ft-lbs. of dynamic strength and factory tested to exceed 1,000,000 cycles of operation, the 1006 is in a class of its own.

5000 Series

The 5000 series is a compact, high performance electric strike designed for low profile openings where there is limited space behind the jamb. Its strength is derived from a unique keeper pin locking design, enabling the 5000 to exceed the ratings of the frame, door and locking hardware. This field selectable fail secure/fail safe unit is easy to install and accommodates latchbolts up to 5/8" throw.

5200 Series

The 5200 series electric strikes feature an in-frame horizontal adjustable design to simplify the installation process. This feature allows the installer to easily adjust the electric strike opening to accommodate the horizontal position of the latchbolt after the strike has been installed. This field selectable fail secure/fail safe unit is easy to install and accommodates latchbolts up to 3/4" throw.

8000 Series

The 8000 series is a compact, high performance electric strike featuring a unique concealed design for use with cylindrical locksets. No cutting on the frame is required. Simply remove the existing strike plate, adjust the vertical alignment feature to the latchbolt centerline, and install. Its strength is derived from a unique keeper pin locking design, enabling the 8000 to exceed the ratings of the frame, door and locking hardware. This field selectable fail secure/fail safe unit is easy to install and accommodates latchbolts up to 5/8" throw.

9600 Series

The 9600 series Genesis™ is a windstorm rated, surface mounted electric strike designed to accommodate rim exit devices with a 3/4" throw latchbolt. All components are completely encased within its 3/4" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt and install. It is field selectable for fail secure and fail safe operation, and for 12 or 24VDC. The 9600 is the only surface mounted electric strike designed with the strength and durability required to exceed the severe forces of ANSI Windstorm testing.

Bosch DS160

The DS160/161 is a passive-infrared (PIR) detector designed for Request to Exit (REX) interior applications. The technology designed into the DS160/161 is based on the principal that all objects emit infrared energy. The warmer an object is, the more infrared energy emitted. Its PIR technology allows the DS160/161 to detect the change in infrared energy that occurs when a person passes through its field of view. 12 to 30 VDC or VAC; Two Form "C" contact sets rated for 1 A each at 30 VDC or VAC max for resistive loads.
