

# State-of-the-Art Warehouse Lighting Design

## WOW Logistics™ Distribution Center, Appleton, WI

### WOW LOGISTICS™ DISTRIBUTION CENTER

An expert in storing and handling food-grade products, WOW Logistics™ is a nationally recognized leader in the industry. The Werner Electric Supply Lighting Design Team created the lighting layout for a newly purchased WOW Logistics warehouse distribution center in Appleton, WI.

This lighting upgrade incorporates cost-effective, energy-saving LED products and qualified WOW Logistics for a \$4,850 Focus on Energy rebate incentive. Equipping the majority of fixtures in the large warehouse with motion sensors, fixtures will power off leaving only occupied areas lit throughout the day. A small portion of light fixtures remain on 24/7 to ensure safety and to provide nighttime lighting.

The WOW Logistics Distribution Center takes advantage of efficient LED lighting design for all areas of the building including the warehouse, office, and exterior. Monetary savings will continue to add up for WOW Logistics due to lighting control and high efficiency fixture selection.

### Product Solution

- Orion Energy Systems high bays with motion sensors/13 watt LED 6L T8 lamps
- Lumark LED wall packs and pole fixtures
- Sure-Lites LED emergency fixtures
- Metalux LED flat panels
