VALUE ADDED SERVICES

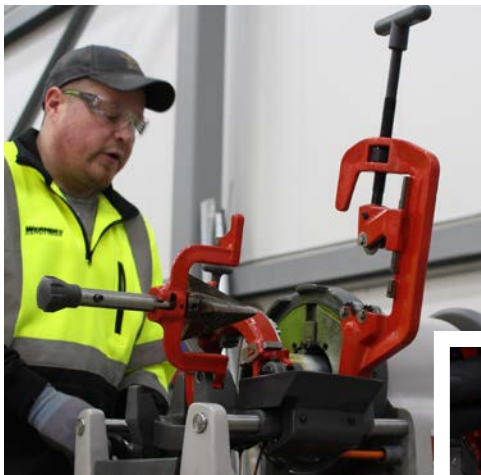

Learn how Werner Electric Custom Services can save you labor, time, and money on the job!
All customization is done in-house and can be delivered directly to your jobsite!

Conduit Bending

Pre-bent conduit from ½" to 4" diameter
EMT, IMC, and Rigid Conduit

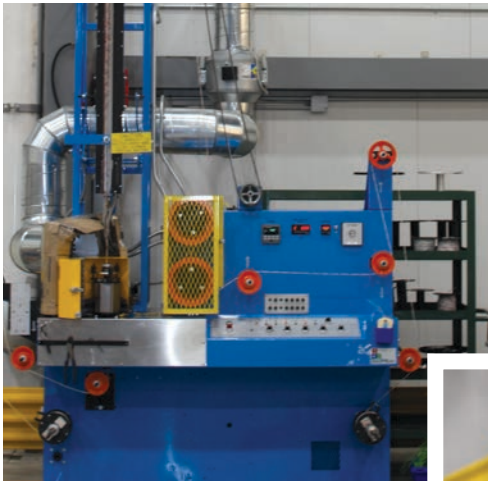

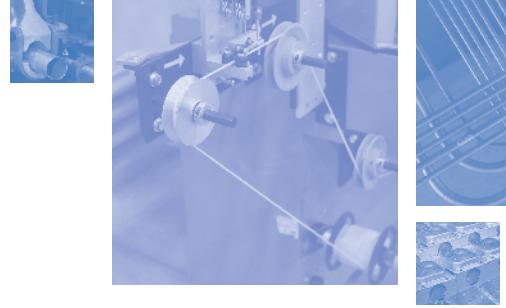

Save money and complete jobs more quickly with custom conduit bending from Werner Electric. We can pre-bend conduit up to 4" diameter EMT, IMC, and Rigid conduit. Using product from our inventory, we can pre-bend conduit and deliver it to your jobsite in 2-3 days.

NEW! Pipe Threading

If you need Rigid or IMC conduit cut to a custom length and threaded, we can do that for you. We have the capability to customize conduit from ½" to 4" in diameter.

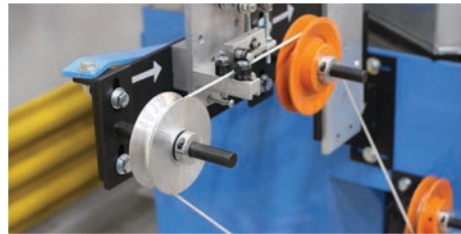

Custom Wire Stripping

Using our vast wire inventory, we can now customize your wire runs with eleven different colors. We supply 72-hour turnaround on in-house custom stripping.

- 18-10 awg
- THHN
- TFFN
- XHHW
- MTW

SPEEDPULL

SPEEDPULL bundles and binds together different types of wire and cable into one compact, flexible, multi-conductor cable. This can include color-coded or numbered copper and electronic conductors. SPEEDPULL provides faster installations and easier identification with every run. Cost savings can increase by up to 30 percent!

- Multiple-type, custom-bundled cables on a single spool
- One fast cable pull
- Easy installation with significant labor savings
- Simplifies material management and material waste on the job
- Quick turnaround

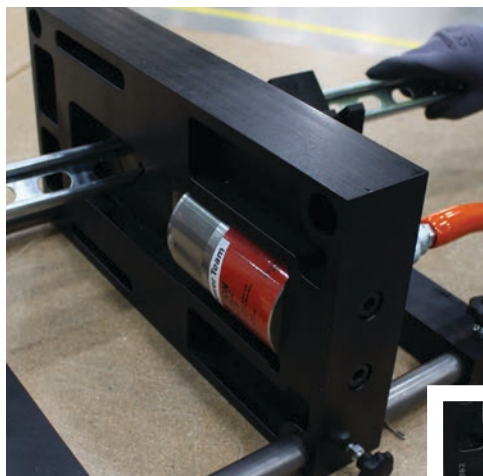

VALUE ADDED SERVICES *CONTINUED*

Enclosure Modification Machine (EMM)

Don't waste time making holes and cutouts manually. Let Werner Electric deliver your Hoffman enclosures and back panels ready to populate. By utilizing Werner Electric's extensive local market inventory, you can enjoy pre-modified enclosures and back panels in 1 to 2 weeks.

- DWG, DXF (we cannot use 3D files)
- Maximum enclosure size is 90" x 90"
- Maximum back panel size is 78" x 72"
- This machine modifies:
 - painted carbon steel
 - stainless steel
 - non-metallic enclosures
 - panelboard tubs
- Drawings produced for customer approval

NEW! Strut Cutter

Go directly from cut to installation. The shearing action of the Wilton Strut Cutter provides a burr-free cut that requires no post processing, finishing, or de-burring. It is ideal for cutting Unistrut®, Powerstrut®, B-Line®, and Superstrut® products. Cutting dies are available for most commercial strut profiles, and the Strut Cutter can also accept custom dies to meet your special applications. Strut products are cut cleanly and efficiently, with no waste, no mess, and no de-burring.

NEW! DIN Rail Cutter

Our customized DIN rail cutter can easily cut the 4 most popular steel DIN rail sizes:

- 35 x 7.5mm
- 35 x 15mm
- 32 asymmetrical DIN rails
- 15mm DIN mini rail

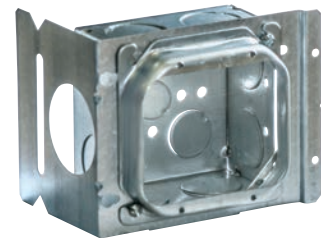

Let Werner Electric cut your choice of industry standard solid or slotted DIN rail. Reduce labor by eliminating the set-up time required for die changeovers. Let Werner Electric cut your DIN rail with burr-free finished cuts. There's no need to perform a secondary filing or grinding – your DIN rail will be ready to go!

Metal Box Assemblies

Significant time and labor savings for contractors!

- Metal box assemblies
- Uni-mount mud ring assemblies
- Direct mount assemblies
- Floor mount assemblies
- Stab-It box assemblies
- Mason box stubs
- Large capacity boxes for data
- Ceiling boxes with pigtails
- Conduit bends/data drops
- Pigtailed devices

Pre-Fab Light Fixtures with Added Pigtails

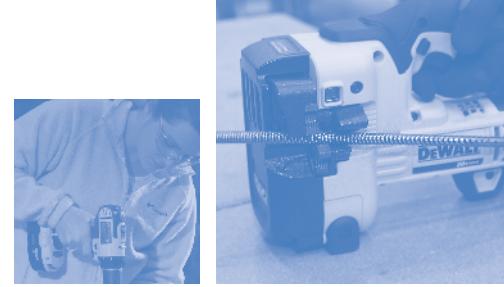

Pre-attached connectors add speed and dependability when finalizing fixture whip terminations. Finalized fixture whips attach or snap directly into the fixture housing and no tools are required for installation. This cost-effective solution eliminates lock and wire nuts. Easily insert the fixture's conductors into the corresponding parts and you're finished.

Custom Fixture Whips

Add speed and dependability when finalizing fixture whip terminations with pre-attached connectors. When you add-up your time and material cost, it makes economic sense to use custom value-add solutions by Werner Electric Supply!

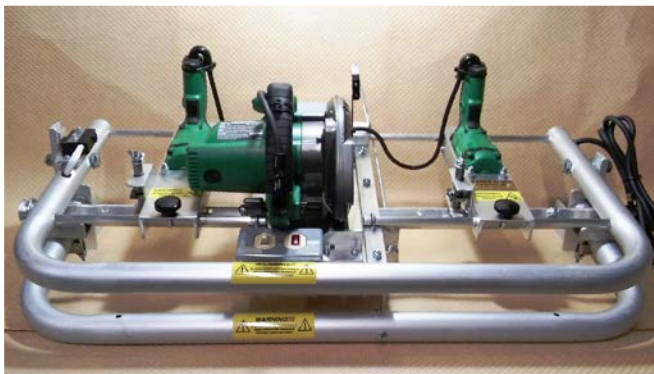

NEW! Threaded Rod Cutter

Werner Electric can cut 1/4", 3/8", and 1/2" mild steel and coarse threaded rod, or 1/4" and 3/8" stainless steel coarse threaded rod. Clean, burr-free threaded rod will allow for easy threading. Your threaded rod will be chip-free and allow for easy threading of fasteners without the need to clean the threads beforehand.

NEW! MC Cable Cutter

Werner Electric's Custom MC Cable Cutter & Pigtailer simultaneously cuts and pigtails MC, AC, HCF, and BX cable as fast as they can be measured, resulting in accuracy and convenience. Let Werner Electric measure and cut your MC Cable and provide pigtails to save you time and money on the job.

The MC Cable Cutter & Pigtailer is the quickest, easiest way to cut and whip MC and other metal-clad cables. Werner Electric routinely cuts 8,000 feet of cable per day, depending on whip length. Our custom MC Cable cutting helps eliminate waste by measuring and cutting only the lengths you need.
