

E-learning Courses

The Skills Gap is REAL and it's only getting wider.

The shortage of skilled, trained people to fill manufacturing jobs by 2025 may reach 2 million of the projected 3.4 million manufacturing jobs needed.*

Effective training methods need to be **flexible, mobile, on-demand, collaborative** and **empowering**.

E-learning is the perfect approach!

E-LEARNING COURSES

- Currently **14 E-learning courses** available across **6 technologies** with more to follow throughout 2019/2020.
- Highly interactive learning with **activities, software simulations, and demonstration videos** for concept reinforcement.
- **Accessible on any tablet, or PC** using Chrome, Safari, IE, Edge or Firefox with viewable transcripts.
- Assessments match each lesson with **CEUs awarded** upon successful course completion.
